Education

Federal University of Rio de Janeiro (UFRJ) Aug 2024 – Aug 2028

Bachelor of Science in Computer Science

Professional Experience

Extension Fellow (COPPETEC and PROFAEX) Aug 2026 – Present

Dean of Extension Office UFRJ Remote

- Development and maintenance of institutional web portal infrastructure, modernizing legacy systems into scalable, containerized architectures using WordPress, PHP, Git, and Docker
- Technological support and stability assurance for major academic event platforms, such as SIAC

Information Technology Intern Sep 2025 – Dec 2025

Super Centro Carioca de Saúde Rio de Janeiro, RJ

- Built interactive KPI dashboards and automated reporting tools integrated with a PostgreSQL database, providing stakeholders with real-time health metrics to support strategic operational decisions
- Front-end development and UI/UX improvements using Vue.js for a robust institutional health system, collaborating within agile methodologies to ensure a working responsive design and continuous feature delivery

Extracurricular Activities

Member of the Competition Team Jun 2026 – Present

UFRJ Analytica Data League Rio de Janeiro, RJ

- Participation in projects, hackathons, and competitions focused on Data Science, Analytics, Machine Learning, and AI
- Application of exploratory data analysis (EDA), cleaning, and processing of complex datasets using Python

Volunteer Web Developer Mar 2024 – Jun 2024

Coopera Esportes Platform (NGO) Remote

- Built and deployed a responsive and modular web platform using React, Next.js, TypeScript, and Bootstrap

Extension Researcher Jan 2023 – Jun 2023

Census Project – UFRRJ Seropédica, RJ

- Processed, validated, and cleaned large-scale datasets and clinical survey forms using Python (Pandas) and REDCap, implementing data quality checks to ensure integrity, consistency, and compliance for health research
- Architected and deployed automated ETL pipelines using Python scripts to transform and load monitoring data into a MySQL database, reducing manual processing overhead and accelerating statistical analyses

Skills

Programming

Python, JavaScript, TypeScript, HTML, CSS, Java, C, PHP, Go, SQL

Tools

Git, MySQL, PostgreSQL, APIs, WordPress, Docker, Advanced Excel, Advanced Word, Advanced PowerPoint, Google Cloud, Power BI, Figma, Agile Methodologies

Libraries

Pandas, NumPy, Matplotlib, Seaborn, Node.js, React, Next.js, Vue.js, SASS, Tailwind CSS, shadcn/ui

Projects

Prescriptive Analytics for Urban Transit

A prescriptive analytics engine utilizing datasets from Data.Rio. Features ETL processing with Python and database modeling in PostgreSQL to monitor urban mobility metrics and generate AI-driven recommendations for transit optimization.

AI-powered Movie Recommender

Application utilizing Graphs and AI for movie recommendations. Builds similarity networks based on movie metadata extracted from the TMDB API and integrates with Gemini to translate the mathematical logic of recommendations into a TypeScript and React interface

Personal Website (Portfolio)

Web application displaying technical projects and resume, featuring modular development with Next.js, TypeScript, shadcn/ui, and Tailwind CSS
